

NodeJS Assignment (SDE 1)

Time Duration - 1 Day

- Create a Node.js CRUD app with functionalities of Add/Update/Delete/Get items from any one of the databases (MongoDB, MySQL, PostgreSQL etc.).
- Implement the endpoints with proper API documentation (e.g. Swagger).
- Implement Test cases for the components in your project (API, Services) using any testing frameworks (Jest, Mocha, Chai etc.).

NOTE: 1. Strictly use typescript to code the assignment.

2. Upload your project to GitHub and change the visibility to PUBLIC for submission.
